

# NGPI Beta Test Guide – Datasets Dashboard

Go here: <https://stg-dashboard.geoplatform.gov>

Last Modified-9/24/2018

## What is it?

A tool for Dataset Managers, Theme Leads, and Portfolio Managers to find, sort through, and view details about Dataset resources published to the GeoPlatform.

## Features include:

- Filtering Datasets by keyword/phrase, theme, or agency.
- Sorting Datasets by agency, service enabled, modified, reliability, theme, and title.
- Selecting Datasets to view more details and information about them.
- At-a-glance view of how many Datasets are "Service-enabled"
- Quickly determine which Datasets are "Service-enabled"

**Instructions:**

1. *Find and try each of the above features.*
  - a. *Usable? If not, why not?*
  - b. *Intuitively obvious? If not, got a suggestion?*
  - c. *Feelings? (Like/Dislike/Meh)*
2. *Spend quality time with it. Try the use-case scenario below then invent your own.*
3. *Find a bug? Please send any bugs, questions, comments, or recommendations to Lara Duffy at [larad@imagemattersllc.com](mailto:larad@imagemattersllc.com)*
  - a. *Include in subject line: "Datasets Dashboard Beta Test"*
  - b. *Don't hold back! Send us feedback as you go.*
  - c. *Let us know soonest if you need help or have questions.*
4. *If you are having trouble logging in, you may be experiencing issues with Single Sign On (SSO) when switching between Beta and Production environments. Please clear your browser's cache and cookies, and then refresh the page (e.g <ctrl>-F5 and try again).*

## Typical Use-Case Scenarios

### UC-1: Sort Datasets

**Precondition:** User has a GeoPlatform Account and can access the Performance Dashboard.

**Steps:**

1. Go to Performance Dashboard (see URL listed above).

2. Click on the “Datasets” link at top of page to get to the Dataset Dashboard.

3. On the Datasets page, click on the  Title (A-Z) drop down menu.
4. Select a category to sort by (the order of results should change).

<div>Q Filter</div> <div>1 - 20 of 418 results</div> <div>20 per page</div> <div> Title (A-Z)</div>				
Title	Reliability	Service Enabled?	Last Modified	Misc
 <a href="#">1 Arc-second Digital Elevation Models (DEMs) - USGS National Map 3DEP Downloadable Data Collection</a>	86 /100 	No	Nov 30, 2017	29 themes  1 publishers 
 <a href="#">1 meter Digital Elevation Models (DEMs) - USGS National Map</a>	81 /100 	No	Mar 9, 2017	1 themes  1 publishers 
 <a href="#">1 meter Digital Elevation Models (DEMs) - USGS National Map 3DEP Downloadable Data Collection</a>	N/A	No	Nov 30, 2017	30 themes  1 publishers 
 <a href="#">1/3rd Arc-second Digital Elevation Models (DEMs) - USGS National Map</a>	71 /100 	No	Mar 9, 2017	1 themes  1 publishers 
 <a href="#">1/3rd Arc-second Digital Elevation Models (DEMs) - USGS National Map 3DEP Downloadable Data Collection</a>	79 /100 	No	Nov 30, 2017	29 themes  1 publishers 

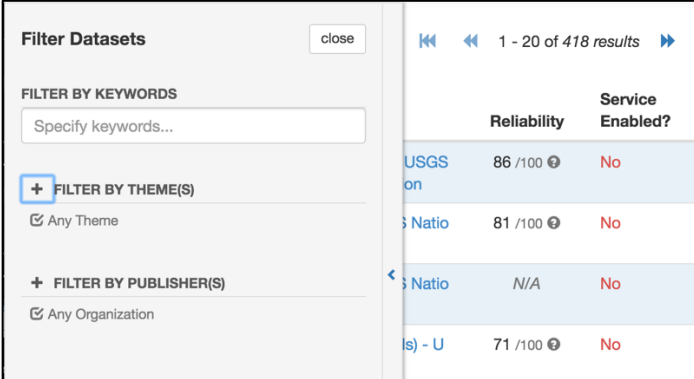

**Postcondition:** The datasets are reordered.

## UC-2: Filter Datasets by Theme and Organization

**Precondition:** User has accessed the Dataset Dashboard Page

**Steps:**

1. Select the  Filter button
2. Click the “Themes” drop-down menu.
3. Select one or more themes.
  - a. The results listed will have updated to list only the Datasets of the selected themes
4. Click on the “Agencies” drop-down menu.
5. Select one or more agencies.
  - a. The results listed will have updated to list only the Datasets of the selected agencies.

The screenshot shows a 'Filter Datasets' modal with a 'close' button. It contains three filter sections: 'FILTER BY KEYWORDS' with a text input, 'FILTER BY THEME(S)' with a '+' icon and a checked 'Any Theme' option, and 'FILTER BY PUBLISHER(S)' with a '+' icon and a checked 'Any Organization' option. To the right, a table displays '1 - 20 of 418 results'. The table has columns for 'Reliability' and 'Service Enabled?'. The visible rows are:

	Reliability	Service Enabled?
USGS on	86 /100 ⓘ	No
Natio	81 /100 ⓘ	No
Natio	N/A	No
is) - U	71 /100 ⓘ	No

**Postcondition:** Only Datasets that match the filter selection are listed in the table.

## UC-3: Search by Keyword

**Precondition:** User has accessed the Datasets Dashboard.

**Steps:**

1. Click the search box.
2. Type in a keyword/phrase to search by, and click enter (e.g., “water”)
  - a. The list of Datasets will update to list only those that contain the search term in one of its properties.

+ FILTER BY THEME(S)

☒ Any Theme

+ FILTER BY PUBLISHER(S)

☒ Any Organization

1 - 20 of 418 results

20 per page

Title (A-Z)

	Reliability	Service Enabled?	Last Modified	Misc
USGS on	86 /100	No	Nov 30, 2017	29 themes 1 publishers
S Natio	81 /100	No	Mar 9, 2017	1 themes 1 publishers
S Natio	N/A	No	Nov 30, 2017	30 themes 1 publishers
(s) - U	71 /100	No	Mar 9, 2017	1 themes 1 publishers

**Postcondition:** Datasets have been filtered to only include those that reference the keyword.

## UC-4: View Datasets Detail Page

**Precondition:** User has accessed the Datasets Dashboard.

**Steps:**

1. Use keyword search, filter, or sort to look through Datasets.
2. Select a Dataset by clicking on its title to view details.

The screenshot displays the 'GeoPlatform Performance Dashboard' for the dataset '1 meter Digital Elevation Models (DEMs) - USGS National Map'. The dashboard includes a header with navigation links (LMA, Services, Datasets, Help, Sign In) and a sub-header with the dataset title. Below the title, it states 'Created by Unknown user on Mar 9, 2017. Last modified on Mar 9, 2017.' The main content area is divided into several sections: 'Details' (with a 'View in Object Editor' link), 'External Links' (with a 'More Info' link), 'Services' (with a link to 'USGS TNM Elevation Availability (NED)' and a note to go to the 'Service Dashboard'), 'Service Statistics' (showing 'Service Enabled: Yes', 'Service Count: 1', and 'Online/Compliant Count: 1'), 'Themes' (with a link to 'Elevation Theme'), and 'Publishers' (with a link to 'DOI-USGS').

**GeoPlatform Performance Dashboard** LMA Services Datasets Help Sign In

**Dataset: 1 meter Digital Elevation Models (DEMs) - USGS National Map**

Created by Unknown user on Mar 9, 2017. Last modified on Mar 9, 2017.

**Details** [View in Object Editor](#)

This is a tiled collection of the 3D Elevation Program (3DEP) and is one meter resolution. Data in this layer represent a bare earth surface. The 3DEP data holdings serve as the elevation layer of The National Map, and provide foundational elevation information for earth science studies and mapping applications in the United States. Scientists and resource managers use 3DEP data for hydrologic modeling, resource monitoring, mapping and visualization, and many other applications. The elevations in this DEM represent the topographic bare-earth surface. USGS standard one-meter DEMs are produced

[Elevation Theme](#)

**Publishers**

[DOI-USGS](#)

**External Links**

[More Info](#)

**Services**

[USGS TNM Elevation Availability \(NED\)](#)

Go to the [Service Dashboard](#) for this dataset's services.

**Service Statistics**

Statistics are averaged over all related services, if any.

Service Enabled:	Yes
Service Count:	1
Online/Compliant Count:	1

3. If the Dataset has related Services, click on a link to a Service to view details about it.

**Postcondition:** The Dataset Details page shows information about the Dataset resource including Service performance statistics (if the Dataset is "Service-enabled"), External Links, and Related Links for the selected dataset.
